SPIRITS

Let these spirits move you toward a more sustainable future. These featured brands adhere to environmentally-friendly business practices and are committed to bettering their surrounding communities. Cheers to a brighter tomorrow!

Sandro Bottega Limoncello

A green company to the Nth degree, Bottega's approach is based on environmental sustainability. During every step of production, they are focused on saving water, lowering CO2 emissions, keeping the use of chemicals to the minimum possible and recycling waste materials. A determination to save energy and use renewable sources has inspired them to only buy electricity from certified renewable sources.

Absolut Vodka

Located in Åhus, Sweden, Absolut Vodka is sourced locally, water drawn locally and their bottles are produced in Southern Sweden using 40% recycled clear glass. The company promotes sustainable farming through their concept cultivation. The carbon neutral distillery pulls 85% of the energy required for distillation and bottling from renewable sources while less than 1% of its waste ends up in landfills.

Tito's Handmade Vodka

Titos is dedicated to protecting our most precious resources and to leaving the world a little better than they found it. This includes utilizing solar energy, waste recycling and using a 600,000-gallon rainwater collection system to support their water usage — in addition to purchasing annual BEF Carbon Credits and supporting The Ocean Cleanup's efforts to remove plastics from waterways.

Tequila Tromba

Tequila Tromba is committed to sustainably-made tequila. Instead of agave waste filling landfills, the company is creating sustainable and useful products from the material like straws and cutlery, striving to become one of the world's only zero-agave waste tequilas. They are also planting one endangered agave plant for every case of Tequila Tromba sold with the goal to plant 5,000 endangered agave plants.

Chivas Regal

Chivas believes in the spirit of generosity and community working together to build a more sustainable future. In the 5 years since launching a platform to support entrepreneurs, Chivas Venture provided \$5 million in funding for 120 startups. They also raised £21k for the Manchester United Foundation and partnered with Beyond the Sport Foundation to create limited-edition gift tins — £0.05 from each donated to the charity.

Glenmorangie Original Single Malt

Glenmorangie is committed to the future use of sustainable raw materials: barley, casks and peat. All four of their sites are ISO-14001 certified and 95% of the Glenmorangie distillery's wastewater is purified through a by-product treatment plant. The company also created the DEEP project (Dornoch Environmental Enhancement Project) to reintroduce oysters in the Dornoch estuary to improve water quality.

Jack Daniel's Black Label Bourbon

The Jack Daniel Distillery is proudly a zero waste to landfill production, utilizing innovative methods. Their grain and yeast by-products are sold as cattle feed and used barrels are transformed into rustic furniture or sold to other beverage alcohol manufacturers. Packaging shrink wrap is turned into decking material while sugar maple charcoal is sold as smoking pellets to cook delicious barbeque.
